MVP Frontend Requirements (React, Tailwind, CSS Modules)

1. Landing Page ("/")

- Minimal design with login/register options

- Routes to `/login` or `/register`

---

2. Auth Pages ("/login", "/register")

- Forms for auth

- Token stored in localStorage

- Redirect to `/dashboard` on success

---

3. Dashboard ("/dashboard")

- Displays links to:

  - Mood Tracker → `/tracker`

  - Journal → `/journal`

---

4. Mood Tracker ("/tracker")

- **UI:**

  - Calendar grid (responsive)

  - Each day colored by mood (e.g., purple for calm, red for anxious)

- **Interaction:**

  - Click day → view/edit modal

  - Add mood (choose color) + optional notes

- **State:**

  - `moodEntries` (fetched on mount)

- ○ `selectedDayEntry` for modal view

---

5. Journal ("/journal")

- **UI:**
    - ○ Sky with animated stars and parallax
    - ○ Click on constellation → zoom to stars
    - ○ Click star → open journal entry
- **Interaction:**
    - ○ Hover = reveal tooltip (mood + time)
    - ○ Modal or sidebar for entry view/edit
- **State:**
    - ○ `constellations` (fetched on mount)
    - ○ `journalEntries` grouped by constellation

---

6. Entry Pages/Modals ("/newmood", "/newjournal")

- Forms to add new mood or journal entry
- Entry updates calendar or sky immediately
- Validation for required fields (date, mood, content)

---

7. Additional Frontend Features

- Subtle animations (CSS keyframes or Framer Motion)
- Dark mode default
- Accessible UI (keyboard nav, ARIA, readable contrasts)
- Mobile-first design
- State Management via Context or Apollo Client
